

Full Stack PHP Developer

Overview

VehicleVision is looking for a highly enthusiastic and motivated Full Stack PHP Developer to join our team in our Leicestershire based office.

About us

VehicleVision is an award winning fast paced, forward thinking, innovative software company that has designed and developed a number of video based SaaS products for the automotive market. We have been first to market with our products in the UK. Our business extends beyond the UK where we provide our software to multiple countries, in multiple languages. Our clients range from franchised car dealerships to global automotive manufacturers.

About you

You will be comfortable with bringing your own ideas and experience to the role. A seasoned communicator, both internally and externally. A truly collaborative nature and bags of enthusiasm are a must have. You will be as enthusiastic finishing a project to a high standard as you are starting a new project. You will live and breathe technology, just as we do. Your enthusiasm will match our ambition.

In return, you will be rewarded with a diverse working environment where ideas, collaboration, enthusiasm and customer delight are fundamental to our values.

Responsibilities

The core role is to develop upon and maintain our SaaS based video software which will include developing brand new features for the product, from the initial specification, through to developing, testing and launch.

Working in a small team, you will work to tight deadlines in an agile environment collaborating with key stakeholders and team members to define feature specifications and be involved in technical discussions.

Ensure that technical decisions support our goals of performance, quality, reliability, scalability and security.

Improve existing functionality and help shape the future of the platform.

You will maintain code integrity, best practice, documentation and be integral to incremental improvements in standards.

Undertake investigation, bug fixing and supporting our users where necessary.
